

Follow the hygiene rules

DISTANCE

Cough and sneeze into your elbow.

Regularly wash your hands in accordance with the instructions on: rivm.nl/hygiene/handen-wassen

Bring along your own paper tissues and throw these away after use. Then wash your hands.

1.5 m continues to be the **SAFE**

Also whilst conducting meetings, eating, lifting, loading and unloading. If it's not clear whether everyone has sufficient protection against the coronavirus. Be considerate of other people's requests.

Could the job be done differently too?

Lift and move mechanically rather than together.

Use resources to keep something in place.

If working at a distance of 1.5 m **ISN'T** possible

Is it not possible to postpone the job? Then put together a team of sufficiently protected people.

Enter into agreements about safe working with the person responsible for corona.

Extra protection?

A face mask or shield won't be necessary if you abide by the above agreements. Would you still rather wear a face mask or shield, or arrange for a screen to be installed, in addition to these agreements? Then make sure you don't do this instead of the above agreements and ensure they are cleaned regularly.

Don't touch the same surfaces wherever possible. Everyone should stay on their own side wherever possible.

Don't share your tools with others.

Unsure about something?

Stop working!
Discuss things together and with the person responsible for corona.

Do you have any questions?

You can call the Occupational Health & Safety Service, or the Construction & Engineering Corona Help
