

# Preventive measures for working at construction sites

Work safely during the coronavirus pandemic and follow the rules below. Your colleagues should be following the rules too, so talk with them if they're not. Help make sure everyone stays healthy.

## Use your own transport to get to the site.

If that's not possible, keep as much distance as possible from others. If more than two people are travelling together, keep at least 1.5 metres apart. Make sure the vehicle is clean and well ventilated.

## Keep your distance (1.5 metres).

Don't shake hands with colleagues, visitors or suppliers. At work meetings, stay at least two arms lengths apart.

If keeping a distance of 1.5m is unworkable, then work in small, fixed teams at fixed locations. Work with others only where necessary. Always practise good hygiene.

## Snack sensibly.

Don't spend your break in a cramped cabin. Have coffee and lunch outside. When the weather is bad, stagger breaks so that you always keep a distance of 1.5m from others.

The following measures also still apply:

## Practise good hygiene

**Wash your hands often.**

**Cough and sneeze into your elbow.**

## Do you have cold-like symptoms?

**Stay at home if you are sick.**

**Limit contact with others.**

**together, we'll get  
corona under control**
