

# Measures at construction sites

Follow these rules to work safely during the COVID-19 pandemic.  
If your colleagues forget, remind them. So that you and they can stay healthy.

Follow the basic rules:

If you have symptoms, stay home and get tested

Stay 1.5 metres away from other people

Wash your hands often

Cough and sneeze into your elbow

The following specific rules apply to construction sites:

**Travel to the construction site with your own transport.** If this is not possible, do a health check before travelling in a shared vehicle. Keep as much distance as possible from other passengers. Wear a face mask if there are 3 or more people in the vehicle. Keep the vehicle clean and ventilated.

**If you cannot keep 1.5 metres away from others.** Work in small, fixed teams at fixed locations. Keep it brief if you need to work with others. Practise strict hygiene.

**Take care on your break.** Do not take a break in a small cabin. Eat and drink outside. If the weather is bad, take turns to sit in the cabin so that you can keep 1.5 metres apart.

**If you're working in a public indoor space.** Wear a face mask, unless it is dangerous to do so. Clearly cordon off your working space to protect your own health.

alleen samen krijgen we  
corona onder controle
